

Achieve the True Mark of Excellence in Patient Care for Your ENT Facility

The Intersocietal Accreditation Commission (IAC) provides accreditation for ENT facilities **utilizing cone beam CT scanners and maxillofacial CT imaging.**

The IAC is a nonprofit organization in operation to evaluate and accredit facilities that provide diagnostic imaging and procedure-based modalities, thus improving the quality of patient care provided in private offices, clinics and hospitals where such services are performed. **IAC accreditation is widely respected within the field of CT as demonstrated by the 13 national medical societies that serve as sponsoring organizations including:**

- American Academy of Neurology (AAN)
- American Association of Oral and Maxillofacial Radiology (AAOMR)
- **American Academy of Otolaryngology-Head and Neck Surgery (AAO-HNS)**
- Association of Physicists in Medicine (AAPM)
- Association of Oral and Maxillofacial Surgeons (AAOMS)
- American Orthopaedic Foot & Ankle Society (AOFAS)
- American Society of Echocardiography (ASE)
- American Society of Nuclear Cardiology (ASNC)
- American Society of Radiologic Technologists (ASRT)
- Society for Cardiovascular Angiography and Interventions (SCAI)
- Society for Vascular Surgery (SVS)
- Society of Cardiovascular Computed Tomography (SCCT)
- Society of Nuclear Medicine and Molecular Imaging (SNMMI)

ENT specialists serve as representatives on the IAC Board of Directors, helping to ensure that the IAC *Standards* and overall accreditation process meet the needs of the ENT community and provide a foundation to create and achieve realistic quality care goals.

IAC accreditation indicates a “seal of approval” that sets your ENT facility apart from the competition – demonstrating to patients that your facility has been evaluated and approved based on quality imaging and safety standards.

Staff from OCEANN ENT in Huntington Beach, CA (left) and ENT Specialists PC in Omaha, NE take great pride in sharing their IAC CT accreditation achievement with patients by displaying plaques in recognition of their ENT practices' commitment to quality.

Join the more than 14,000 IAC-accredited facilities who consistently express the highest levels of satisfaction with the customer service and resources offered by IAC.

Customer Service. Clinical IAC staff are available to guide you through the process via phone, live chat or e-mail.

Helpful Resources. The IAC website offers free resources for applicant facilities including a robust calendar of CE courses, live webinars and webcasts offering CE credit. Plus sample and guidance documents, an accreditation checklist and more!

Peer Review. IAC provides a clinical peer review of case studies (with pathology) to evaluate diagnostic quality, report accuracy and report completeness.

Quality Improvement Tool. Facilities use the tool to assess their case studies and final reports and receive a quantitative report targeting opportunities for continuous process improvement. Physicians may use the IAC QI Tool to satisfy a component of MIPS performance measures under the improvement activity category.

National Recognition by Payers. Approved by CMS as a designated Accrediting Organization (AO) under the MIPPA law, IAC provides support to its accredited facilities as they document their compliance with reimbursement requirements to insurers.

Fees. IAC accreditation is a cost-effective solution for your facility, offering discounts and a single application for multi-site facilities.

Online Application. Our web-based application is specifically designed to be user-friendly and convenient with 24/7 access.

Case and Image Uploads. IAC's HIPAA-compliant, secure medical image sharing service ensures safe submissions and more rapid, efficient processing of your facility's application.

Celebrating 15 years teaming up with the IAC and with YOU to support our commitment to quality patient care.
