

VetCAT™

portable CT for your clinic

Xoran is passionate about helping animals and supporting veterinarians.

CLINICAL BENEFITS

on-demand CT in your clinic

isolate bone fractures in high definition in all directions with a click of your mouse

examine your region-of-interest with easy zoom, pan, rotate, and scroll options

view images in full 3D volume rendering or by 3D cross section

share images with veterinary radiologists with XoranConnect—a web-based image storage and remote-viewing program

PRACTICAL BENEFITS

adding portable CT to your clinic

hone your expertise and expand your ability to see and understand the specific anatomy of your patients and disease or injury from a fully 3D perspective

share scans with pet owners to help educate them as to their pet's condition so they can approve surgeries and improve compliance with your treatment plan

supplement your revenue by charging for scans and by increasing referrals

portable CT for your clinic

Xoran is passionate about helping animals and supporting veterinarians.

DIAGNOSTIC SCANS DURING EXAMS*

self-shielded VetCAT rolls up to the exam table for 20-second scans

INTRAOPERATIVE SCANS

take VetCAT scans during surgery to ensure your treatment plan is on track

VERIFY SURGICAL COMPLETENESS

confirm that you have successfully executed your surgical plan prior to closing

*The VetCAT gantry (the opening where the animal is placed for scanning) is large enough to accommodate full body CT scans of smaller animals and anatomy-specific scans of larger animals, such as head/neck or extremities-only scans.
