XORAN

TELERADIOLOGY SERVICES

XoranConnect gives you remote access to CT scans via secure, HIPAA compliant cloud storage and back-up

Xoran's image-viewing CT systems equip you with an acquisition PC and optional additional viewing stations that enable you to access and view patient studies on-site with a full range of customized software functions. With this package, you may also access your Xoran software and patient database on other compatible PCs in your local area network.

XoranConnect *takes you mobile*, enabling you to view patient scans remotely with any compatible device.

Xoran Teleradiology services provide access to teleradiologists who can write CT interpretation reports – all within the convenience of XoranConnect.

What's more, with the LiteViewer functionality of XoranConnect, you can remotely perform the key functions of your system's software within many browsers.

FDA CLEARED

XORAN CONNECT
